23. Problem: (use additional Sheets if necessary)
Tivoli Management Framework, Enterprise Console, Distributed Monitoring, and Software Distribution are to be upgraded at the sites in support of the deployment of Sybase ASE 12.5. The new versions need to be evaluated in the IDG Cell. The following machines are to be used:

TMR Server:	miami (Sun)
Gateway:	clydes (Sun)
Endpoints:	miami, clydes, protog1 (two Suns and an SGI, respectively)

24. Proposed Solution: (use additional sheets if necessary)
See additional sheet.

25. Alternate Solution: (use additional sheets if necessary)

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
We would have to use some other machine for pre-integration testing of Tivoli, or forego testing the Tivoli upgrade in the IDG cell as per the standard COTS upgrade process.

27. Justification for Emergency (If Block 15 is "Emergency"):
Upgrade effort is approximately 1.5 mos behind schedule.
